Figure 1: Testing for proteinuria in those \textit{not} at risk for CKD^1

- Urine reagent strip for total protein
  - Negative/trace
  - \( \geq 1+ (300 \text{ mg/L}) \)
  - Protein-to-creatinine ratio
    - \( \leq 200 \text{ mg/g} \)
    - \( > 200 \text{ mg/g} \)

  - Recheck at next health evaluation
  - Diagnostic evaluation
    - Treatment
    - Consultation

Figure 2: Testing for proteinuria in those \textit{at risk} for CKD^1

- Urine reagent strip for albumin
  - Negative
  - Positive
  - Albumin-to-creatinine ratio
    - \( \leq 30 \text{ mg/g} \)
    - \( > 30 \text{ mg/g} \)

  - Recheck at next health evaluation
  - Diagnostic evaluation
    - Treatment
    - Consultation
